To Whom it May Concern,

As the project lead of Drupal and co-founder of Mollom, I have had the pleasure of working with Wim Leers on more than one occasion over the last four years. At Mollom, Wim built our entire e-commerce and subscription management platform. At Drupal, Wim is known and respected contributor to Drupal's scalability features — some of his code is used by the United Nations, Arizona State University, the national Belgian television, The Economist and thousands of other websites. Finally, I also had the pleasure to review Wim's Master Thesis.

In short, I have seen many examples of Wim's talent and dedication, and have long been impressed by his diligence and work ethic. I have no doubt that compared to his peers, Wim will demonstrate above-average performance.

I understand that Wim is applying for a job at Facebook. Based on my personal experience working with Wim, I would like to strongly recommend him. Don't hesitate to contact me at dries@buytaert.net in case you have additional questions.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Dries Buytaert', with a stylized flourish above it.

Dries Buytaert
Founder and project lead Drupal
Co-founder and President at the Drupal Association
Co-founder and Chief Technology Officer at Acquia
Co-founder and Chief Executive Officer at Mollom
